Post Office Department, Ottawa.

SUBSCRIPTION \$2.00

Let's Have A Sane Hallowe'en

Whisperings have been overheard among the younger generation of what they intend to do on Hallowe'en which will be here this weekend. This one evening of the year is cherished by the younger generation as being the night when they can masquerade themselves and have a real jolly time. We of the older generation feel that we would like to go back a few years and join them in their fun, but alas, that cannot be. We must sit on the side lines so to speak, and enjoy in a quiet way the pleasures which the children are getting out of their night's frolic.

However, there is a vast difference among children as to what constitutes a night's entertainment. Some of them, especially the younger ones, go harmlessly from door to door asking for and in most cases receiving, apples, nuts, candies, etc. They do not plan on creating any disturbance, and in this they are indulged. Others older in years, feel themselves above this way of spending Hallowe'en and go out for an evening on mischief bent. Anything lying loose around private property and business premises is removed and in many cases real loss is caused by the destruction of property. Roads and sidewalks are cluttered up to the danger of the travelling public. This form of entertainment should not and cannot be tolerated as it may mean the loss of life or the crippling of some person.

You boys and girls who are planning on celebrating Hallowe'en should make those plans with the object of taboos anything that savors of causing damage or annoyance. You can have just as good a time through innocent pleasure with a great deal of more satisfaction afterwards if rough stuff is cut out of your plans.

Parents of Gleichen could help out very materially if they would advise their children to avoid anything savoring of rough stuff.

Come, boys and girls, what do you say? Let's have fun Hallowe'en but let that fun confine itself to real enjoyment without any aftermath.

ST. ANDREW'S CHURCH
Sunday, November 1st.
Harvest Thanksgiving Service at 11 a.m.
Rev. P. Pennant, M. A., Rector.

HARDINESS IN RASPBERRIES

One of the more important factors influencing the commercial production of raspberries in this part of Southern Alberta is the lack of winter hardiness in the cultivated varieties. A grower who plans raspberry production on large scale is faced with the high labor cost of covering his canes in the fall and uncovering them again in the spring. Unless this procedure is carried out the resulting loss in fruit yields is such that raspberry production becomes unprofitable.

It is surmised that the killing of the flower buds on the exposed canes occurs from the warm, drying Chinook winds which are common through the winter. The months of November and December are critical in this regard, and great fluctuations in temperatures easily upset the balance, causing damage to the plant tissue, which are irreparable. The result is loss of fruiting canes for at least one year.

Few if any of the cultivated varieties presently being grown in Southern Alberta may be expected to survive if winter protection is not provided. Two varieties which have shown indications of some hardiness are Newburgh, a widely grown variety, and a new variety called Gatineau, of which the latter is the hardier.

The staff of the Lethbridge Experimental Station has made many examinations in recent years of exposed wild raspberry plants in the foothills of Southern Alberta. A number of plants have been found which seem to possess a high degree of hardiness. Several crosses have been completed of these wild plants and the variety Newburgh, in an effort to transfer hardiness to the cultivated

variety. It is anticipated that in his way a raspberry variety might conceivably be developed having sufficient hardiness to withstand the Southern Alberta winters without protection.

One maniac with the power to drop one atomic or hydrogen bomb might precipitate the end of this world as we have known it. Suppose that one so heedless of consequences as Massadegh had possessed an atomic bomb that he might have used to bring the world down with him, would he have done that in his hour of desperation? Syngman Rhee does not see the destruction of civilization as a greater calamity than the destruction of Korea. Would he use an atomic bomb to precipitate a war? Would Beria use an atomic or hydrogen bomb in a desperate gamble to gain world domination if he could overthrow Malenkov? Are there men within other nations who believe that world war is inevitable, who would drop a nuclear bomb to commit the world to war at the moment they regarded as most propitious? World control of nuclear weapons and other armaments is the most urgent concern of mankind.

News Items of Local Interest

All Gleichen people who suffered an attack of polio are recovering. Some will be in hospital for some time before they can come home.

Mr. and Mrs. Dennis Woods who have been spending the past couple of weeks in town on their annual holidays left last week for their home in Vancouver.

Mr. and Mrs. Roy Allen who are well known in Gleichen but now living in Vulcan will celebrate their golden wedding anniversary on Wednesday, November 4th. They will have open house all day and invite their Gleichen friends to go and see them.

Ever stop to consider what the milling process does to 100 pounds of wheat? It doesn't all come out flour. Here's a rough classification of the products: 100 pounds of wheat give approximately 23 pounds cattle feed plus 77 pounds crude flour. By further milling, the 77 pounds of crude flour

provides approximately 3.85 pounds low grade flour plus 73.15 pounds of straight flour. Still further processing of the straight flour gives approximately 21.95 pounds of clear flour, (used largely in prepared or self rising flour products) and 51.05 pounds of patent flour, the high grade product used by your baker to make bread.

Mr. J. Giedde of Enchant is the new C. P. R. station agent here. Mrs. Gieddie and three children have also arrived and taken up residence at the station.

Messrs. Busby and Elliott have been busy for the past week setting St. Andrew's church on the concrete foundation. At the present time they are completing minor repairs to the building. When the repairs are finished the church should be good for another fifty years.

Another bunch of workers turned out Sunday to work on the new

skating rink. The floor was laid and much work done on the walls of the dressing rooms. A lot of work yet remains to be done such as getting the roof on and the walls around the ice area.

Miss Lynn Hall entertained a number of her friends to a birthday party last Saturday. The little folks had a swell time.

Joe Old Woman of the Blackfoot reserve was found lying by the road side last Tuesday suffering from injuries. His team had bolted and he was dragged some distance and was thought to have laid on the ground for about six hours before found. Taken to Colonel Belcher hospital he was found to be suffering from a compound fracture of the left arm and cuts and bruises about the body.

Earl Moore has moved a large single story building to Gleichen which he has set on a couple of lots adjoining Wm. Schmit's Sales and Repair Service shop. The building was moved here from Gem. Since Mr. Moore's business is moving buildings the shop will be used to store his trucks and

house moving equipment. His wife and children have moved to town and occupy the residence next to St. Andrew's Church.

A myth of native Canadian superiority has vanished like a morning mist in the sun of reality. An unfounded belief that nature had endowed those born in Canada with a superior wisdom to match their rich resources has been shattered by the achievements of new Canadians in all parts of Canada. The delusion that natural or personal wealth connotes superior qualities of mind or character leads nature's beneficiaries everywhere to take it easy and to do less than their best. On the contrary, difficulties overcome determine the quality of individuals and peoples. Most new Canadians come from lands that have known struggle for centuries. Their peoples know, as Canada's pioneers knew, what many of us have forgotten, that true success is a by-product of striving. All Canadians, native and new, may live happily together if each realizes that there is no royal road or inherited road to individual happiness and common good.

SEE 1954's new PLYMOUTH

MORE VALUE THAN EVER!

TRY

HY-DRIVE NO-SHIFT DRIVING

FULL-TIME POWER STEERING

AMAZING BALANCED RIDE...

It's Chrysler's greatest Plymouth!

Here's exciting new beauty... longer and lower lines... new gem-bright colours and sparkling chrome... new striking interior ensembles in the latest two-tone fabrics.

Brilliant new performance, too! A powerful, lively engine... the sensational Plymouth Balanced Ride, now even smoother and softer than ever... Hy-Drive*, for no-shift driving at its simplest and easiest... Full-Time Power Steering*, so effortless you can park with one finger... all add up to a great new driving experience.

There's much that's new in this greatest Plymouth ever... in beauty, performance, famous Chrysler Engineering and downright dollar for dollar value. Plan to see and drive this beautiful Plymouth that your whole family will love!

DRIVE WITHOUT SHIFTING!

Plymouth's new Hy-Drive lets you drive through traffic—stop, go, climb hills—without touching gearshift or clutch! Pick-up is wonderful with fast, oil-cushioned fluid-torque. To back up—or for extra power in sand or snow—you change gears in the familiar way.

PARK WITH ONE FINGER!

With Plymouth Full-Time Power Steering, you can park with one finger—steer without effort. Hydraulic power does 4/5 of the steering work for you. You'll be amazed how easily, how safely, you can handle your car.

FEEL THE NEW POWER!

This newest and finest of Plymouth engines has 108 H.P.—and higher 7.0 to 1 compression ratio to get peak performance from standard or premium fuel. It floats on cushions of live rubber—gives you wonderfully smooth, quiet, long-lived performance.

SEE HOW SMOOTH ROUGH ROADS BECOME!

The amazing Plymouth Balanced Ride is balanced against roll—pitch—and bounce. It gives you a ride so soft, so steady, that it seems to repair rough roads as you drive. It's a Plymouth with a built-in boulevard!

NEW LUXURY, TOO!

The new Plymouth interiors are luxuriously soft and comfortable... with chair-high seats... deep bolsters... fine fabrics in beautiful two-tone colour combinations and contrasting vinyl.

Pioneer Hunters Recall Days Of Unlimited Bags

(By The Canadian Press)

REGINA—Saskatchewan's 50,000 nimrods may not have as much fun as their duck-hunting grandfathers but—thanks to conservation and protective measures—they know there will be birds to shoot next year. Pioneer hunters like to tell the younger generation of that era when ducks did not fly by the grace of the government, when bags were unlimited and when conservation was a term that had something to do with the winter's meat supply.

Oldtimers recall flights of geese so large that it took a flock 30 minutes to pass a given point. They tell of mallards splashing upwards from a meal and blotting out the sun.

Most of the tales come out of the Qu'Appelle valley where the almost legendary Jack Leader would provide luxurious entertainment for anyone who wanted a day's shooting. Anyone, that is, with the right kind of money.

Leader's Point, on Pasqua lake, still is one of Saskatchewan's most popular hunting spots. Notable visiting the point have included the Prince of Wales, now the Duke of Windsor, Lord and Lady Minto, Lord Byng of Vimy, and Bernard Baruch.

Fred Dunk, former curator of the provincial museum, describes a typical shoot in the valley in which he and a companion bagged 35 ducks in one morning and stretched to 200 birds their total for a two-day shoot.

Spring shooting was allowed, the sale of game for commercial purposes was common and bag limits and licences were unheard of.

It was the era of the unplugged

automatic shotgun and live decoys, some of which were trained by hunters to honk or quack at the desired moment.

Geese, ducks and Prairie chickens hung in front of butcher shops. Housewives stretched their pin money, the records disclose, by trapping Prairie chickens during the winter and peddling them to the local meat vendor.

The methods of taking the wildfowl were as varied as the bags were large. Guns as big as eight gauge were in common use, and firelight shooting was the fad at the turn of the century.

Old letters reveal that some hunters frequently used multiple guns. One of these contraptions consisted of about six standard shotguns secured to a log, pointed at a duck roost, and fired by means of a rope leading to the hunter's blind.

But all that changed when Saskatchewan became a province in 1905. Spring shooting was abolished in 1907, a licence fee was levied in 1910, and in 1915 the sale of game was prohibited.

Provincial archives reveal that predecessors of today's game wardens were hired by the agriculture department, and were known as weed inspectors. Game conservation was just a sideline.

IN BRITISH COLUMBIA

Nylon Nets Effective In Catching Salmon

VANCOUVER.—Salmon fishermen at the mouth of the Fraser river now largely use nylon fish nets, instead of the old-style linen nets.

Fishermen say nylon nets are four times as effective. As a result, virtually no fish have been able to get through the net barrage during the open season, and fisheries officials have been forced to impose longer closure periods as a conservation measure.

So great is the demand, nylon web is being flown to this coast from New York. It's twice as expensive as linen, but it's effectiveness more than makes up for that.

Nylon is almost transparent in the water and salmon are unable to avoid the nets in their surge upstream. They are also clean and do not pick up silt and organic matter. It is also easier to extricate fish from the nylon because of more elastic properties.

"Nylon gear is just as deadly," said one fisheries official in explaining need for longer closure periods.

Salvation Army Starts Home For Alcoholics

VANCOUVER.—The first home for alcoholics to be set up by the Salvation Army in Canada was opened here recently by Commissioner W. R. Dalziel of Toronto.

The home, to be known as "Harbor Light", is located on Skid Row near Vancouver's waterfront.

"We did not choose Vancouver first because we thought it had the biggest alcoholism problem in Canada," Commissioner Dalziel said. "But the problem here is a big one. Few people know much about the sordid side of life in our big cities."

He said the home, which will sleep about 20 men, had been renovated and decorated almost exclusively by reformed habitual drunkards.

"We hope that as many as 80 per cent. of the people who come to us will be reclaimed from the evils of drink."

The Maoris immigrated to New Zealand in a fleet of canoes in the 14th century.

Funny and Otherwise

A vivacious brunette of about 40 was standing on the promenade at Southsea when she heard an admiring whistle from a very young sailor. He ambled up purposefully.

"Son," she reproved him gently, "don't try to flirt with me. I'm a grandmother."

"But, grandma," replied the undismayed sailor, "what big eyes you have!"

I told Jim all my past history yesterday."

"What did he say?"

"Nothing. He just took out a comb and smoothed his hair down."

A man went to his doctor and requested treatment for his ankle. After a careful examination the doctor inquired: "How long have you been going about like this?"

"Three weeks."

"Why, man, your ankle's broken. Why didn't you come to me before?"

"Well, every time I say anything is wrong with me, my wife declares I'll have to stop smoking."

"I think you've met our small son John."

"Yes—how is the little fellow?"

"Does your wife have her own way in the home?"

"Well she writes up her diary a week ahead."

Brown was awakened one night by a strange moaning outside his bedroom window. After he had listened to it for some time he got up and looked out to see what was causing the weird sound.

By this time Mrs. Brown was awake, too. Sitting up in bed, she called to her husband: "What is it, John?"

"It looks like a ghost," he replied in a hoarse whisper.

"Oh, really," she asked. "Anybody we knew?"

The would-be Menuhin sat in a corner every evening with his violin. Holding one finger rigidly on the same spot, he drew the bow back and forth for hours on end.

"Henry," said his wife, "I've noticed that when other people play, they move their fingers around and use all four strings."

"Yes, I know," Henry replied. "They're looking for the place. I've found it!"

Guess what I've cooked for dinner, darling?"

"All right, dear, serve it up and I'll try."

"But, my dear," gushed the pretty girl in the railway carriage, "one must have the right clothes. When I go riding I wear a riding habit; when I go out in the evening I wear evening dress . . ."

"Really," interrupted a man who was trying to read his paper. "And what do you wear at birthday parties?"

A visitor to the village attending church and afterwards a resident asked him what he thought of the service.

"I liked the service very much," said the visitor, "but one thing puzzled me: why did the congregation hurry out so quickly after the Benediction?"

"Well," the native replied, "the sexton makes them leave their umbrellas in the porch, and those who get out late haven't much of a choice."

A husband and wife were out together when they ran into the husband's girl friend. The poor man had no way of getting out of an introduction. The wife, acknowledging it, murmured sweetly: "My husband has told me so little about you."

"Anything new in the paper, dear?" asked the wife.

"Yes, there's been an earthquake at a town called Kno-jkarslau," replied her husband.

"Does it say what it was called before the earthquake?"

Average Albertan Receives Weekly Wage of \$59.21

The average weekly pay cheque paid to Albertans in July, 1953, amounted to \$59.21, according to figures released by the Bureau of Statistics. This is an increase of \$4.73 a week over last year.

The present weekly wage paid in Alberta is the second highest in Canada, surpassed only by British Columbia's average of \$64.11.

The bureau also reports Alberta has shown the largest relative increase in Canada for employment and payrolls since 1939. Employment has increased almost 140 per cent. during the past 14 years, while payrolls now are 460 per cent. of the 1939 average. Following Alberta are Ontario and British Columbia with increases of 100 per cent. for employment and 400 per cent. for payrolls over their 1939 figures.

Do You Know That . . .

Largest type of living bears, male Polar bears sometimes weigh as much as 1,600 pounds.

HAPPY VOYAGE

THE PAS, Man.—The guests of honor arrived in a small boat when Mr. and Mrs. Oscar Little of Cedar Lake attended their own 25th wedding anniversary. They travelled 75 miles down the Sask-

atchewan river for the celebration at the home of a daughter and son-in-law.

A cubic foot of lithium, the lightest metal, weighs about 30 pounds.

Short and Sweet Bake it with MAGIC!

MACE & ORANGE SWEET BREAD

Mix and sift 3 times, 2½ c. once-sifted pastry flour (or 2½ c. once-sifted hard-wheat flour), 3½ tps. Magic Baking Powder, ¼ tsp. salt, ¼ tsp. ground mace. Cream ½ c. butter or margarine and blend in ¾ c. fine granulated sugar; beat in 1 well-beaten egg, 1 tsp. grated orange rind and ½ tsp. vanilla. Add dry ingredients to creamed mixture alternately with ¾ c. milk. Turn batter into a loaf pan (4½" x 8½") which has been greased and lined with greased paper. Bake in moderate oven, 350°, about 1 hour. Allow loaf to cool in pan. Spread sliced cold bread with butter or margarine for serving.

FREEZE-UP protection ALONE is NOT ENOUGH!

"PRESTONE" ANTI-FREEZE GIVES EXTRA* PROTECTION AGAINST WINTER ENGINE ENEMIES!

*What EXTRA protection means to YOUR CAR...

"Prestone" Brand Anti-Freeze—the most effective anti-freeze ever developed for your car—is fortified with a combination of special ingredients to give more—much more—than just freeze-up protection.

"Prestone" Anti-Freeze gives your car EXTRA protection against: Rust and Corrosion, Acid Contamination, Clogging, Seepage, Foaming and Deterioration of metal and rubber parts. NO OTHER ANTI-FREEZE CAN GIVE YOUR CAR THE SAME COMPLETE PROTECTION!

FREEZE-UP. Proved over millions of miles under the most extreme winter conditions, "Prestone" Anti-Freeze gives winter-long freeze-up protection.

RUST, CORROSION and FOAMING LOSS.

"Prestone" Anti-Freeze provides EXTRA safeguards against rust, corrosion, acid contamination, seepage and foaming under the most severe driving conditions.

ENGINE WEAR. "Prestone" Anti-Freeze permits the use of high opening temperature thermostats to give peak engine performance, reduce cold weather oil sludge, engine deposits and WEAR.

GAS CONSUMPTION. Using "Prestone" Anti-Freeze and a high opening temperature thermostat you can let your engine operate at a higher temperature. This means greater efficiency and gives more miles per gallon of gasoline.

PATTERN 210

AIRPLANE WEATHER-VANE TURNS IN THE BREEZE

This graceful plane measures two feet between wing tips. It is finished in white enamel with red and black trim. The propeller picks up in the slightest breeze as the whole plane turns into the wind. It should be mounted on a separate standard, the garage ridge-pole, or in any exposed area. The pattern gives actual-size cutting guides for individual parts with directions for assembling and mounting. The price of Pattern 210 is 35 cents. Your pattern will be mailed the day your order is received. For first class mail delivery enclose 2 cents extra or 5 cents for air mail which saves one to five days, according to distance from New York.

Here is a cabinet that will hold the hand tools usually found in a well equipped shop. The beginner in woodworking with a growing stock of tools should start with the center panel and the first pair of wings which form the doors. As more tools are acquired the second pair of wings may be added. Both pairs of wings are then folded in so that the cabinet when closed and locked requires no more wall space, as shown at the lower left in the sketch. The tool cabinet and the bench pattern are 35 cents each and should be ordered by number. Patterns will be sent by first class mail if 2 cents extra for each pattern is enclosed. The additional postage for air mail is 5 cents per pattern. Address your order to:

Home Workshop Pattern Service, Prairie Publishers Limited, 4483 West Fifth Avenue, Vancouver, B.C.

OUR COMPLETE SHORT STORY —

Onions for Understanding

By Maude Norman

OUTSIDE Estelle Monroe's door, James hoped he would hear her high, clear voice calling him back. Her laughter when he asked her to marry him! You! she had exclaimed. "Darling, you're crazy!" That is what had fooled him. Her "Darling" habit. She even called her dog that.

He dreaded the evening broadcast. Other nights, when he tucked the violin under his chin, his eyes had been for Estelle. And after the show, "Darling, you were wonderful!" He had been living in a fool's paradise.

Back in his apartment, in an old-fashioned, converted house, he paced restlessly.

A knock sounded at the door. Glad of the interruption, he opened it. A girl stood there, dark

hair tied back with a red ribbon and a frilly apron over a plain black dress. James had a vague impression he had seen her somewhere.

"Do you have an onion?" she asked hopefully.

James stared. "A what?"

"An onion. I'm making a meat pie and discovered I had no onions and a meat pie is pretty sad without them. I judge from your expression you have none. I guess my pie will be onionless."

"I could get you some," James volunteered.

"Would you really? I'd appreciate it no end. I live on the third floor. I'll be in the kitchen so will leave the door ajar. It's simply wonderful of you."

"Not at all," he denied politely. "Of course I wouldn't refuse if you offered pie as a reward."

"My goodness!" the girl exclaimed, when he brought the bag, "how many did you get?"

"Five pounds. Enough?"

"More than enough. You'll have to help me eat them, Mr. Nelson."

You know me?" James asked, surprised.

"Know you! You're too modest. Everyone knows James Nelson, the new violinist who skyrocketed to fame practically over night. Especially when they're on the same program with you."

"Why haven't I seen you?"

"There are several answers to that," she said airily. "One, I'm just a singing commercial. You know, 'Why scrub your teeth to make them white? Use Sunshine Foam to keep them bright.' Another, you're not apt to notice a little twinkle when the star is smiling at you. I'm Jennie Carter."

"Miss Monroe is very kind," he answered, stiffly.

"Isn't she? She's always helping young artists up the ladder of fame, especially if they're males," Jennie agreed, impishly. "Would you set the table, while I make the gravy?"

James found himself whistling as he smelled the delicious odour. This was fun, he decided.

"I didn't know anyone cooked their own meals in New York," he said later. "I thought everyone ate out."

Jennie's smile revealed dimples. "I love to cook, but you're the first company I've had since Estelle's son was here before going to Florida."

James straightened. "Estelle has a son?"

"As old as you are. He has his own band. Estelle wanted him to stay here with her, but he wanted to be on his own. I don't blame him. Here he was just Estelle Monroe's son. He'd never get anywhere shining in her reflected glory."

"I suppose that's why she's nice to me," James mused. What a fool she must have thought him. Thinking of fools, he turned the subject sharply.

"How did you have dinner ready so quickly if you had to wait for the onions?"

"More coffee?" she asked, hastily, reaching for his cup, but he caught her hand. "Not until you explain."

"You would think of that," she sighed. "You will consider me perfectly shameless, but you always looked past me, instead of at me and I had to do something to make you see me. The onions were simply an excuse to get you up here. This is still Leap Year, remember."

Despite her brazenness, James had enough grace to smile. Anyway, his vanity was tickled. Now he could wash his hands of the Estelle episode.

"Do you think me bold?" Jennie asked.

"I wish you had been bold sooner," he grinned. He knew he would play better tonight than ever before, because when he tucked the violin under his chin he wouldn't have to worry about Estelle and where to keep his eyes. (Copyright Wheeler Newspaper Syndicate)

Do You Know That . . .

Pure gold does not tarnish but is easily scratched and is very soft. For coinage, it usually is hardened with 10 per cent. copper. 3058

The Community Sports Day

The following interesting article appeared recently in The Minnota Herald, Manitoba, which was taken from the Cincinnati Times-Star. Mr. Nixon Denton of that paper, inserted in his column "Second Thoughts" a letter written by Miss Janet Weidenbein of that city. She vividly describes the community "Sports Day" that are held every year on the prairies:

Mr. Denton writes as follows:

"I was a trifle hasty some time back, I guess, when I reprinted a piece from a Canadian newspaper, implying that baseball north of the border wasn't likely to become more popular than cricket, hockey, or getting lost in blizzards."

"Miss Janet Weidenbein of 4007 Drew Avenue, explains that our national game, as it is termed, does very well indeed among Her Majesty's Canadian subjects, hinting that most of them, at least, are well aware of the difference between a catcher and a short-stop, and do not believe, for an instant, that the Cincinnati Reds are Communists."

"Dear Mr. Denton, she writes—Since we never miss your column we couldn't help but read a week or so ago, about the Canadian newspaper clipping which you received, that took a very dim view of America's favorite pastime of baseball. I'm afraid, Sir, that my family holds quite a different opinion."

"For the past several years we have spent our vacations with relatives who own a wheat ranch in western Manitoba. They are located about 200 miles west of Winnipeg and 30 miles east of the Saskatchewan border where the winters are long and the summers short. There the farmer works hard all year long, but especially so during the growing season from dawn to dusk. (I might add that so far north the sun comes up at 4 and sets at 11). But, no matter how busy these people may be, they never miss the local Sports Days, travelling from a 50-mile radius over mud lanes and cow paths to get together for a day of picnicking, gossiping—and baseball."

"By nine in the morning many have already gathered at the ball field, an old cow pasture which still has the landmarks of its former occupants. A long, low wooden building which serves as a skating and curling rink in the winter is utilized as a lunch room where one can buy covered dishes and the like donated by the townsfolk. Wood, salvaged from someone's old barn and some old chicken wire form the backstops for the diamonds."

"The spectators, mostly wives, children and girl friends, sit in their cars, parked as close as possible, or, if they have no cars, brave the 90 degrees, broiling sun. "Although a stiff, hot, summer wind blows dust in their throats and into their eyes, the rooters are undaunted and make so much noise that even our Redlegs couldn't ask for more encouragement."

"At 10 a.m. the scrub teams including one from a nearby Indian Reserve, begin the play-offs, consisting of six innings to the game. By noon four games have been completed and everybody takes time out to quiet the grumblings of the kids and their own stomachs with potato salad, meat loaves and pop, while the mosquitoes with the speed and accuracy of dive bombers take care of their own food wants nicely."

"In the afternoon the play-offs continue, with as many as four

FALSE TEETH THAT LOOSEN NEED NOT EMBARRASS

Many wearers of false teeth have suffered real embarrassment because their plate dropped, slipped or wobbled at just the wrong time. Do not live in fear of this happening to you. Just sprinkle a little FASTEETH, the alkaline (non-acid) powder, on your plates. Holds false teeth more firmly, so they feel more comfortable. Does not sour. Checks "plate odor" (denture breath). Get FASTEETH at any drug store.

PERFUME OF A CANADIAN AUTUMN—One of the experiences most Canadians remember from childhood is the burning of leaves in autumn. The sweetish odor, billowing smoke and the haze that the burning leaves produce are typical signs of the season in cities and towns from coast to coast.

Penicillin Saves Lives Of Reindeer Mauled By Bears

KAMLOOPS, B.C. — How penicillin saved the lives of reindeer after they had been mauled by a grizzly bear was related by Grady Carrothers. A Texan, Mr. Carrothers paused here on his way from Nome, Alaska, to his native state. He arrived with 13 reindeer, three of which were injured by the bear. With him was his 13-year-old son, Jack.

A 400-pound bear attacked the reindeer at Fort Nelson, on the Alaska highway, while Carrothers and his son were sleeping in their pick-up truck.

Penicillin administered by an R.C.A.F. medical officer saved the animals' lives, Carrothers said.

"He looked after the reindeer as though they were babies — a mighty fine gent, that sawbones," he said.

"The attack came when it was pitch dark in a deserted spot along the road. The animals stayed close

together. They were wild with fright but pawed at the bear and hit him when they could with their antlers."

Father and son jumped from the truck, Carrothers grabbing his gun. He fought his way through the milling reindeer and managed to get a good shot at the bear, which escaped.

Carrothers' reindeer are booked for Santa Claus parades in New Orleans, Memphis, California and as far as Chicago. The pair now have travelled about 3,000 miles from Nome, north of where they roped the reindeer out of a herd of 20,000, and have 3,500 more miles to go before they reach home.

Carrothers said there is much ignorance among many people in Texas as to the habitat of the reindeer.

"Why, the Eskimos we got these reindeer from know more about Texas than all the teachers and professors down there know about reindeer and Eskimos," he said.

games simultaneously on different parts of the field. About 8 p.m. only the championship game remains. This is played nine full innings. All in all 10 or 12 games are played, the prize being \$25.

"All the players are volunteers from the surrounding farms and receive nothing for their aching muscles and wind-burns except the excitement of competition and fellowship, for the prize money is used to buy equipment."

"Also, each community has a 'Sports Day' so there is one practically every week, topped off by a dance in the community hall that lasts until dawn. Then everybody goes home to milk the cows and do the day's work."

"In Brandon the wheat capital of the province, a minor league has been started and the exhibition schedule is as stiff as the schedules in our own major leagues."

"Many of the players are well known, even in the small outlying communities which see them on rare occasions."

"After our own experiences you can hardly blame us for feeling that baseball is an Ameri-Can (American-Canadian) pastime and that is as important to our northern neighbors as it is to us."

AGILE OLDSTER

COURTENAY, B.C.—Spectators gasped when they saw a man performing acrobatics atop a 100-foot spar. After topping the seven-foot top section of the tree, the daring logger stood up straight and was recognized as Swanty Kyollen, 60-year-old grandfather.

FAMED COW SUMMERLAND, B.C. — Summerland Standard Flo is dead. The 18-year-old Jersey cow which set numerous milk-producing records and became a lifetime Jersey butterfat champion had to be slaughtered after contracting disease.

Today is yesterday's pupil.

Resources Of Alberta Rolls Up Surplus

EDMONTON.—The Alberta government had an over-all surplus of \$23,584,446 on income and capital accounts at March 31, provincial auditor C. K. Huckvale, said in the 1952-53 public accounts report released.

This was an increase of \$17,046,730 over the surplus at the end of March, 1952.

Operating surplus to the end of last March totalled \$77,508,956, largest in the province's history. The over-all surplus is obtained by subtracting the net capital expenditure of \$50,960,511 from the operating surplus.

The operating surplus represented a \$29,904,230 increase over that of March 31, 1952, while net capital expenditures were up \$12,857,499.

With a net funded debt of \$94,801 at the end of the last fiscal year, Alberta had cash and investments totalling \$108,397,993, more than enough to pay off the debt if it wished. Adding the unfunded debt and certain guarantees for which the government is liable, the total public debt totalled \$102,466,718.

The government paid off \$3,871,440 of the debt during the year.

Revenue on income account for the fiscal year totalled \$154,743,686, or \$159.53 per capita on the basis of a population of 97,000. Expenditures reached \$77,234,730, or \$79.63 per capita.

Major revenue was \$66,812,501 from fees, of which \$50,362,561 came from oil and natural gas activity.

Recorded Soil Erosion At 9,000 Pounds Per Acre

EDMONTON.—The Soils department of the University of Alberta recorded soil erosion at a rate of 9,000 pounds per acre during a recent storm which struck nearby St. Albert.

In seven minutes, 7/10 of an inch of rain fell in the area, a record for the Edmonton district. The storm occurred July 30.

The university established eight plots at St. Albert in 1949. They are designed to study effect of crop cover, crop rotation, and intensity of rainfall and the amount of run-off and soil loss.

Loss of soil by erosion was suffered most by a plot of summer-fallow. A wheat plot showed some loss but was protected considerably by its crop cover. A natural prairie plot was not affected by the downpour.

Manufacturing Increases 100 Times Since Formation Of Alberta

The growth of Alberta's manufacturing industry has been impressive when it is considered in relation to the Province's dependence on the main industry agriculture.

Alberta's manufacturing industry produces \$500,000,000 worth of goods and materials yearly, 100 times the value of production in 1905. In those 47 years, the number of manufacturing plants has increased from 97 to nearly 2,000. There are 27,000 persons employed by Alberta's manufacturing industries and their salaries and wages approximate \$80,000,000 annually.

The group manufacturing foods and beverages produce more than 54 per cent. of the total annual production of manufacturing industries as a whole, having a total value of production of \$250,000,000 in 1952.

Next largest of the manufacturing groups is that of petroleum and coal products which produces more than 17 per cent of total manufacturing production. The wood products industry follows with a value of production of \$42,000,000 in 1952 while the manufacture of iron and steel products is next, with a 1952 value of production of \$20,000,000.

Other industries, in order of their importance to manufacturing, are non-metallic mineral products, transportation equipment, printing and publishing, chemical products, clothing and paper products.

Coyote Control

More and more farmers are getting into the business of raising chickens, turkeys, geese and ducks. These birds are being raised in large numbers and are being sold for profit. Coyotes are a real menace to these birds and are causing a great deal of damage. The farmers are now using a new method of control which is very effective. This method is called "baiting" and it is very simple to use. The farmers are now using a new type of bait which is very attractive to the coyotes. This bait is made of a mixture of meat and poison. The coyotes are attracted to the bait and eat it. The poison then kills the coyote. This method is very effective and has been used successfully for many years. The farmers are now using this method to control the coyote problem and are getting a great deal of success. The coyotes are now being killed in large numbers and the farmers are able to raise their birds in peace. This is a great relief for the farmers and is a great success for the coyote control program.

Rastus, charged with theft was on the witness stand, and the judge sought to discover if he knew the value of an oath.

"Rastus, if you tell a lie under oath, do you know what happens?" "Yessah, judge, I goes to hell." "And if you tell the truth?" persisted the judge. "I goes to jail," said Rastus.

THE NEW 1954 DODGE MAYFAIR LEADS IN BEAUTY

Twelve different solid colours and 48 two-tone combinations are available on the new 1954 Dodge cars now on display in Dodge-DeSoto showrooms across Canada. This emphasis on colour is carried through to the car's interior where two-tone colour combinations in trim and upholstery harmonize with the exterior body colour. A new, more massive looking grille sets off the increased use

of chrome that accentuates the longer body lines. Included in the Dodge Mayfair luxury series is the 4-Door Sedan shown above, a Mayfair hard top, and a Mayfair convertible. Completing the range of Dodge 6 cars for 1954 is the middle line Dodge Regent series and a lower priced Dodge Crusader series.

The Crow and the Pitcher

A THIRSTY CROW found a Pitcher with some water in it, but so little was there that, try as she might, she could not reach it with her beak, and it seemed as though she would die of thirst within sight of the remedy. At last she hit upon a clever plan. She began dropping pebbles into the Pitcher, and with each pebble the water rose a little higher until at last it reached the brim, and the knowing bird was enabled to quench her thirst.

OUR COMPLETE SHORT STORY —

Sixteenth Birthday

By MARY L. AKSIM

CHILDREN are so... She racked her mind for the word which the English teacher used so easily. Naive. That was it. All the fuss the twins were making about her birthday. As if birthdays mattered. As if anything mattered. As if it mattered that Don hadn't asked her to go to the dance tonight.

She turned full face to the mirror above the frilled dressing table and ran a hand through her hair. She wished that the twins would stop all that giggling and rustling of tissue. They were wrapping up her present, she knew. Oh well, she supposed she would have to make the effort and act pleased anyway. And what would she do all the long evening?

There was one thing. She wouldn't let Mother and Dad and the twins go through all that childish performance of singing Happy Birthday and pretending to spank her this year. And she would come up to bed early with a good book. She would have to pretend to be very interested in books now, since there would never be any men in her life.

She clutched her hair suddenly to the top of her head in the fashion of an up-sweep. Yes, that style was certainly becoming to her. She would have worn it if she had been going to the dance. And the blue dress with the nail-heads glittering. Oh well. She sighed and stared forlornly at her image in the mirror, but the reflection was disappointing. Her face was too round to be effective in melancholy. She seized a comb and drew it like a rapier through her heavy locks, pushing the parted hair back impatiently. Then she wound the mass at the nape of her neck into a demure knot and held it so, studying the pose anxiously. She wondered how the other girls would wear their hair at the party. And what she would say when they asked her why she

hadn't been there. She emitted an artificial cough and listened to its echo judiciously. Perhaps she was coming down with a cold and wouldn't be able to leave the house for ages and ages. Until long after the dance had been forgotten.

There was Dad calling. What was she doing? Nothing. Nothing at all. Strange how neither Mother nor Dad had asked about the party. But what did a dance more or less matter at their age?

She felt inconsolably old as she adjusted two hair bows to a bored nicety. Sixteen, she reflected sadly, is about the only age when you see things as they really are. Take her parents, for instance. They could outdo the twins in make-believe. She shuddered to think what the best psy—, psy—, mind specialists would say to Mother's constant reports of conversations with the fairies.

She would never tell a child about fairies. But of course, she would never be married and have children of her own, since men avoided her. She stretched her arms across the empty years after the manner of a dramatic actress she had seen once. Large round tears squeezed out from underneath her eyelids as she tightened her hairbows.

She considered her mother's life as she tidied the dressing table aimlessly. No one could say that she was very beautiful. Sweet and bright, yes, but there were ever so many women more striking in appearance. Yet Dad was so very devoted to her. Certainly her mother had never suffered as she was suffering now.

And Bob had always said "we" when he talked about the dance. Why hadn't he called? Was he taking someone else? Oh, it only she could go away from this hateful place forever! She moved suddenly to the window to look out darkly at the early dusk.

Was that the telephone? I'll answer it, Dad, please! Would she never, never reach the landing? And when she lifted the receiver, would she be able to hear above the thumping anthem of her heart?

Oh, yes, Bob, I'd love to! Yes, yes, ready at nine. She oozed a great liquid sigh and turned from the telephone.

And there were Mother and Dad and the twins all looking anxiously up at her from the living-room doorway. The darlings! Had they been worried, too?

She flew towards them and hugged them collectively and separately. The twins brought her parcels and Dad and Mother led her towards the birthday table where a cake with sixteen candles shone pink and white.

"Happy birthday to you, happy birthday to you," sang the twins with a sincerity which made up for their lack of unison.

She sighed happily. Birthdays were such fun.

(Copyright Wheeler Newspaper Syndicate)

AN ARROW, more than two feet long, that pierces this seagull's body has neither killed it nor noticeably hampered its activities. The photographer stalked the bird with a 15-inch telephoto lens at an upstate New York lake where he obtained the pictures of the bird on the ground, (left), and in flight, (right). It was believed that the bird flew within range of archers at a nearby range.

Quadruplet Calves Set Stock Record

WEYBURN, Sask. — The quadruplet bull calves, born last September to a good grade Hereford cow owned by Nat Wolton of Creelman has apparently established a livestock record.

According to the Canadian Hereford Digest, Calgary, "no other case of Hereford quadruplets is recorded in Canadian history, as far as can be ascertained."

The Digest carried a brief account of the quadruplet calves. It also carried an advertisement by the Canadian Hereford association using a picture of the calves, stating "Herefords are prolific—one important characteristic for prolific beef production."

Interest in the multiple births continues at a steady pace. The

latest inquiry concerning the animal rarity has come from F. B. Hunt, professor of animal genetics, Cornell University, Ithaca, New York.

Prof. Hunt has written owner Nat Wolton to verify press reports on the multiple births. The professor said he was particularly interested in the proportions of sexes in such multiple births in cattle.

The professor stated that "quadruplets in cattle are extremely rare, but many years ago there was a case like yours in Holsteins near Brandon, Man."

In the Brandon foursome three of the calves were heifers and one a bull.

Weyburn agriculture representative A. M. Crowle said Monday that from all enquiries made, no record of quadruplet calves born to a beef type of cow where all calves have lived has been brought to light.

At last report all four calves were thriving well.

HUGE RAVEN SHOT NEAR INDIAN HEAD

INDIAN HEAD.—A yard measure wouldn't span the tip-to-tip wingspread of a huge black marauder brought down by Jack Wilson here. The bird, far from a native of these parts, was a raven. Its wingspread was a full four feet.

Mr. Wilson states the birds are common enough in northern Saskatchewan, but added that "You never see them down here."

Bulking about the size of five or six crows combined, the bird looked for all the world like a crow that had forgotten to stop growing. Its beak was four inches long, and its legs were larger than those of a chicken. Mr. Wilson brought the bird down on the marshes at Dry Lake.

FANCY SHOOTING

HYTHE, Alta.—Hunting in the Peace river valley, L. H. Maricle reported bagging seven Canada geese and one mallard—with only two shots. Maricle was using an ordinary old 12-gauge shotgun.

Newspapers Help Make Stronger, Healthier Nation

NIAGARA FALLS, Ont.—O. W. Titus said recently that the daily and weekly newspapers and the periodicals of Canada are making a strong contribution towards a stronger, healthier and more unified Canada.

Mr. Titus, newly elected president of the Canadian Electrical Manufacturers' association, urged Canadians to give increasing attention to their own newspapers and magazines as a path to gaining better understanding of Canadian personality and achievement.

English Group To Settle In Edmonton Area

NOTTINGHAM, England.—One hundred prospective Canadian immigrants have banded together in a plan to settle in Alberta.

The group has formed an association which will charter a plane for the crossing in 18 months' time. The members are contributing to a fund to be held in reserve for Canadian rainy days and are scheduled to get to know one another fairly well before leaving.

The project should simplify adjustment snags in the opinion of Fred Coupland. He and his wife originated the idea, which has the blessing of Canadian settlement officials. The group plans to settle at Edmonton.

Current meeting place for the association is in a school. The principal hasn't decided yet whether he'll join the party.

HEADACHE?
FEEL BETTER FAST!
ASPIRIN

BACKACHE May be Warning

Backache is often caused by lazy kidney action. When kidneys get out of order, excess acids and wastes remain in the system. Then backache, disturbed rest or that tired-out and heavy-headed feeling may soon follow. That's the time to take Dodd's Kidney Pills. Dodd's stimulates the kidneys to normal action. Then you feel better—sleep better—work better. Get Dodd's Kidney Pills now. 81

HOW TO HOLD FALSE TEETH MORE FIRMLY IN PLACE

Do your false teeth annoy and embarrass by slipping, dropping or wobbling when you eat, laugh or talk? Just sprinkle a little FASTEREETH on your plates. This alkaline (non-acid) powder holds false teeth more firmly and more comfortably. No gummy, gooey, pasty taste or feeling. Does not sour. Checks "plate odor" (denture breath). Get FASTEREETH today at any drug store.

THE TILLERS

—By Les Carroll

HERE AND THERE

Mr. Ross Fiddes received word last week of the death of his grandmother, Mrs. David Keith at Tara, Ont., on Oct. 20th.

Mr. and Mrs. O. Geddes and two

boys of Calgary spent Sunday in town visiting Mr. Geddes aunt Mrs. Lewis.

Mrs. J. C. Kilcup who has been here for the past month owing to the illness of her son Clifford has returned to her home at Portland, Ore. Clifford is making a good

recovery after a severe attack of polio.

A number of new trailers arrived in town during the past week and will likely stay here for the winter. Three of them are located in the east end trailer camp of the town. For the past several years

there have been large numbers of trailers in town the year around and the people who lived in them helped to make much business for the town merchants.

For years past houses and buildings in Gleichen have either been torn down or moved away. Now buildings are being moved to town and new ones erected. Thus the town is slowly growing.

Melville son of Mr. and Mrs. H. H. Babilzke had the misfortune to have his hand caught in a combine and had his thumb badly torn.

Almost every day the aroma of burning grass fills the air around town. By getting rid of the high grass lessens the danger of fire in the middle of the night or on a windy day. The vacant lots look much better for the treatment.

How often do we find difficulty in thinking of just the right word to express a certain idea? Even the greatest writers must often stop to weigh their words in order to hit upon the most appropriate one, while few speakers can observe all the niceties of expression without writing out their speeches and memorize them beforehand. These difficulties are not due to any lack of words in the English language, however. Possibly it may be a result of our having too many to choose from. The English language contains more than 400,000 words and the list is increasing constantly. A leading lexicographer estimates

that the educated person of fair ability understands on an average of 50,000 words but uses only a small part of that number in either speaking or writing. The mass of the people know and use less than 8,000 words out of the 400,000. An interesting experiment is to inspect a few pages of a dictionary and count how many words out of a hundred you are really familiar with both as to spelling and meaning.

The Liverpool Corn Trade Association announced recently that trading in wheat futures will reopen at Liverpool on Dec 1st, 1953, and that the authorized months for trading will be decided later. The Liverpool futures market has been closed for 14 years and it is understood that now foreign traders will be able to buy, sell and trade wheat on this market except that foreigners will not be permitted to re-export from Britain any wheat delivered to them on contract. On January 22, 1953 the British government announced they had decided to abolish governmental buying of wheat and other cereals and that the whole business in grain would later be turned back to the hands of private merchants and traders. This became possible on May 1st this year.

Then there were two travelling salesmen who spent the night on the floor in the kitchen of a farm house. The farm was owned by

a widow and she explained carefully that it wouldn't look right if she let them use any of the rooms upstairs. Some months later one of the travelling salesmen received a letter from the widow's lawyer. In some consternation he went to his buddy. "Say," he said, "when we spent the night in that farmhouse did you sneak upstairs after I was asleep?"

"Why, yes, I did."

"And did you give the widow my name instead of your own?"

"Er—yes—it was only a joke and I didn't think there was any harm in it," said the second salesman.

"Nothing to get mad at—," "Mad?" said the first salesman. Who's mad? The widow just died and left me her farm."

FROM THE FILES OF THE CALL TWENTY YEARS AGO

Much building activity has been in progress on the Blackfoot reserve during the past summer which has kept a number of Gleichen men busy. A number of residences and barns for the Indians have been erected in various places and a new residence for the farm instructor at South Camp.

Sergeant and Mrs. Tomlinson of Red Deer spent a few days in town last week visiting friends. Sergeant Tomlinson was for some years in charge of the police here before being transferred.

The Gleichen jewelry store is no more. Vic has packed up and left for Peace River.

Some 27 Legion members and friends of Gleichen attended the Legion dance at Milo last Friday evening given by the members of that district.

Mr. and Mrs. Jack Moss and family of Vegreville spent a few days in town last week at the home of Mrs. Alstot.

Gleichen's new library will open just as soon as the necessary shelves have been installed so state the committee in charge.

J. O. Bogatie now has the most up-to-date dairy business we have ever had in Gleichen.

The first snow of the season fell Thursday, Friday and Saturday to a depth of 10 inches.

There is some talk of the Gunners entering senior hockey this winter and playing in the league consisting of Calgary and Drumheller. There are some who think it a great idea and there are others who think otherwise.

It is now possible to rent the Gleichen Community Hall on a hot and cold basis. With an atmosphere of the equatorial variety it costs more, but with polar air less.

The Golf Club telephone bridge party last Friday evening proved to be a wonderful success. Bridge was played in the following residences: Mr. and Mrs. J. Hutcheson, Mr. and Mrs. George Gooderham, Mr. and Mrs. T. H. Beach, Mr. and Mrs. Garland and Mr. and Mrs. A. MacCallum. The younger people demonstrated their playing ability by carrying off the prizes, viz ladies first, Miss A. Evans; ladies booby, Miss B. Taylor; gents first, Mr. Myers and gents booby, Mr. S. Hayes.

DODGE for '54

DODGE MAYFAIR 4-DOOR SEDAN

So much more driving ease and safety can be yours

DODGE WITH HY-DRIVE

With Dodge Hy-Drive you just shift into high—and go! You can drive all day without shifting... maneuver through traffic... stop for red lights... glide off again with a smooth, silent surge of power. You soon forget about gear-shift and clutch. There's nothing new to learn—if you wish to back up, or need extra power when driving through sand or mud—just shift in the familiar way.

DODGE WITH POWER STEERING

For the most effortless parking and steering you will find in any car—try Dodge Full Power Steering. From the moment you start your engine, hydraulic power takes over 4/5ths of the steering effort. You can't imagine how easy it is to park—to drive through traffic—to turn corners—to control your car on bumpy, rutted roads. You can turn the wheel with one finger—even when your Dodge is standing still.

New Power — Brilliant Performance — Fine Car Comfort

Never before such power, performance and fine car comfort—even for those who have owned a Dodge. One glance at the longer, more lively lines tells you there's wonderful driving ahead.

There's a new feel to the new, more wonderful Dodge engine, designed to take full advantage of today's finer gasolines. You'll sense the nimble, fast response in your first few seconds behind the wheel.

You ride on an improved system of spring suspension that smooths out rough roads three ways. Try it. You'll be delighted with how much more level—steadier—and softer it is... how easily this new Dodge takes curves and corners—sits low and hugs the pavement.

And there's interior luxury to match this new Dodge performance: Comfortable chair-high seats—deep cushions and bolsters—fine fabrics and vinyl in beautiful two-tone shades to harmonize with new trim and body colours.

Never before has Dodge offered so much. Come in today, test-drive the 1954 models and see for yourself. You'll find there's a car in the Dodge family that's right for your family.

SEE THEM TODAY AT YOUR DODGE-DESOTO DEALER'S

New 108 H.P. Engine has a higher compression ratio to take advantage of today's finer gasolines—is rubber mounted for extra smoothness—has all the dependable long-life Dodge engine features.

New Comfort and Beauty Interiors are completely redesigned and upholstered in the newest, long wearing fabrics trimmed with vinyl. Interiors of Mayfair models are particularly luxurious.

Easy to Enter and Leave Wide, high doors make all Dodge models easy to enter and leave. In two-door models the front seat is split 1/2-1/2 to provide entry to the rear compartment without disturbing front seat passengers.

Superb All-Round Vision Chair-high seating, wide one-piece curved windshield and high, wide side and rear windows combine to provide unsurpassed, safe, all-round vision.
